Dylan Tuna

Senior Fullstack Engineer | Product AI · Founder AI · Fullstack AI

Nancy, France | +33 6 51 90 25 18 | tuna.dylan@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Product-oriented Senior Fullstack Engineer with 9+ years of experience delivering SaaS platforms and interactive web applications. Uses **OpenAI Codex and Claude Code** for agentic software development with skills, rules, hooks and structured workflows. Strong in TypeScript, React, Next.js, Node.js, **Git, CI/CD**, UX, API design and end-to-end product delivery. Target roles: Product AI Engineer, Frontend AI Engineer and Fullstack AI Engineer.

AI & AGENTIC ENGINEERING

Production LLM integration: OpenAI API, GPT-4, prompt engineering, system prompt design, text completion and rewriting, editorial corrections, content optimization.

Agentic development workflows: OpenAI Codex, Claude Code, agent skills, rules, hooks, context management, task decomposition, repeatable workflows.

Quality & delivery: Human-reviewed AI-assisted coding, codebase exploration, refactoring, testing, Git workflows, CI/CD.

TECHNICAL SKILLS

Frontend & product: TypeScript, JavaScript, React, Next.js, Tailwind CSS, UI/UX, design systems, Figma.

Backend & data: Node.js, NestJS, REST APIs, GraphQL, MongoDB, PostgreSQL, SQL, Prisma, Auth.js.

Cloud & tooling: AWS Lambda, AWS S3, Vercel, Web Workers, Socket.IO, Stripe, Git, automated testing.

PROFESSIONAL EXPERIENCE

SportsDynamics | Senior Fullstack Software Engineer | Jul 2025 - Jul 2026

- Led frontend and fullstack delivery for a sports SaaS platform, building reusable data-rich interfaces and maintainable application foundations.
- Integrated third-party sports APIs and built a conditional entity studio for configurable product experiences.
- Implemented workflow automation with AWS Lambda and Web Workers; improved performance and scalability.

Lempire (TweetHunter) | Senior Fullstack Software Engineer | Apr 2023 - Aug 2024

- Integrated OpenAI GPT-4 API calls into TweetHunter to complete tweets, correct text and optimize social content, using precise system prompts to steer generated outputs.
- Developed content automation features and refactored SaaS application foundations to support scale and reliability.
- Built Twitter/X automation and screenshot/video pipelines; improved CI/CD and observability.

Weblib | Fullstack Software Engineer | Dec 2021 - Apr 2023

- Owned the end-to-end migration from multiple repositories to a monorepo, simplifying developer workflows and maintenance.
- Delivered web product features with UI/UX teams and supported modernization of legacy applications.

PROFESSIONAL EXPERIENCE (CONTINUED)

Paragone (formerly MakeMeReach) | Fullstack Software Developer | Apr 2019 - May 2021

- Built audience targeting, creative studio and analytics features for an ad-tech platform with third-party social network APIs.
- Redesigned database schemas, optimized ETL/reporting and diagnosed a module handling more than EUR 1M in managed campaign investments.

Pernod Ricard | Fullstack JavaScript Developer (Consultant) | Mar 2018 - Mar 2019

- Built an internal data-focused web platform connected to a data lake; redesigned the user database and delivered tested fullstack features.

Formiris | Web Developer | Dec 2016 - Dec 2017

- Developed CMS features and a responsive public website with blogging, event management and content workflows.

Vivaneo | Web Developer Intern | Oct 2015 - Dec 2015

SELECTED PERSONAL PROJECTS

One Piexel | one-piexel.gg | Creator · Product & Fullstack

- Developing a fan-made One Piece pixel-art browser fighting game with online matchmaking, ranked play and arcade gameplay.
- Owns end-to-end design and development: gameplay systems, interface, character assets, stages and release content.

ICONIC | iconic-game.gg | Creator · Product & Fullstack

- Created an icon-guessing browser game with themed sets, user accounts, challenges, progression and premium content.
- Built with Next.js, React, TypeScript, Auth.js, MongoDB and AWS S3; owns product UX and technical architecture.

FASTR | fastr.gg | Creator · Realtime & Fullstack

- Created a real-time multiplayer word party game with themed rounds, scoring, leaderboards and player statistics.
- Built with Next.js, TypeScript and Socket.IO; deployed via Vercel and Render.

EDUCATION

L'École Multimédia | Master, Mobile Application Development | 2016 - 2017
INFA | Multimedia / Fullstack Developer Training | 2015

CERTIFICATION

AWS Certified Developer - Associate | Amazon Web Services | 2019 - 2022
